

Simon **TENGGREN**
Software Engineer

 simontenggren.xyz
 github.com/taffr
 simon.tenggren@gmail.com

Software developer with 4+ years of experience primarily working with backend development, most notably in Node.js with TypeScript. Passionate about writing performant, maintainable, and testable code, especially in languages leaning towards the functional paradigm. I love working in teams where knowledge sharing is in focus, and enjoy exploring new languages and technologies.

My free time is split between spending time with my loved ones, perusing antique shops, swinging kettlebells, and reading classic literature.

 EDUCATION

2016 - 2022 M.Sc. in Engineering, Information and Communication Engineering Technologies, LTH, Lund University

 SKILLS

Programming Languages	TypeScript*, SQL*, JavaScript*, Elm*, Python, C#, Java, C, Haskell
Frameworks and Libraries	NodeJS*, React*, NestJS*, WebRTC, ExpressJS*, Cypress, Jest, Mocha/Chai*
Tools and Services	Linux, Docker*, Testcontainers*, Google Cloud Platform*, AWS*, Git*, GitHub Actions*, MongoDB*, Elasticsearch, Terraform, PostgreSQL, Vite, Claude Code
Methodologies	Test Driven Development (TDD)*, Behaviour Driven Development (BDD)*, Agile, Functional Programming*, Software Architecture*, OOP, CI/CD

* PROFESSIONAL EXPERIENCE

 EXPERIENCE

Current Apr. 2026	Fullstack Developer - Senior Software Engineer, PINMeTo, Malmö Promoted to Senior Software Engineer after showing expertise in leading teams to success; both technically and by meeting stakeholder expectations. Notable achievements include leading the architecture effort of the first new product offering in several years at PinMeTo. Employing Hexagonal Architecture/Ports and Adapters , leading to unprecedented delivery speeds, while maintaining high standards on code quality. Due to our teams high confidence in delivery due to our BDD testing, we spearheaded AI adoption in the organization leading to being the team with the highest velocity in the organization. Software Architecture Testcontainers BDD TDD AI Assisted Development
Mar. 2026 Jan. 2025	Fullstack Developer - Experience Software Engineer, PINMeTo, Malmö Employed as a Fullstack Developer, working with PinMeTo's main product, Listings, which manages location information across different networks such as Google Maps, Facebook, Bing, and many others. Here I led my team in development efforts such as making new APIs to allow users to integrate with our services. I architected our solution thoroughly and had quality "built-in" as the highest priority. For my efforts and achievements I was awarded the Product Person of the Year award. TypeScript MongoDB Elm AWS Lambda AWS S3 AWS SNS AWS SQS Leadership
Dec. 2024 June 2024	Fullstack Developer - Consultant, CAMPHOUSE, Malmö New assignment at Camphouse to aid with their biggest client to date, and to improve current data aggregation in Camphouse's reporting service. Here I was introduced the Shape-Up methodology, working in small focused teams for six week "sprints". Elasticsearch Shape-Up Methodology NodeJS NodeJS Streams TypeScript React Event Driven Architecture

May 2024 Sept. 2023	Backend Developer - Consultant, INGKA, Malmö Backend developer in the Mobile Application Team (IKEA App on Android/iOS). Contributed to the backend services, using NestJS and TypeScript. Here I learned more about Google Cloud Platform (GCP), including Google Cloud Run for hosting our containerized application , Google Pub/Sub for application messaging, and Cloud Functions for both HTTP request and event handling. Led initiatives on improving code quality, such as introducing and enforcing code standards and proper unit and E2E testing , as well as teaching good TypeScript practices . Hosted knowledge sharing events each Friday with my colleagues on the backend team to share perspectives and ideas. Google Cloud Platform (GCP) Docker Cloud Run Cloud SQL NestJS Terraform TypeScript GitHub Actions CI/CD PostgreSQL Prisma Configuration Management
June 2023 Sept. 2022	Fullstack Developer - Consultant, CAMPHOUSE, Malmö Camphouse aids organizations world wide with their marketing campaign management through their SaaS Webapp. I was assigned to help them implement several larger features requested by their largest customer to date. My role during this assignment was primarily as a backend developer in a small and focused team that moved at a fast pace to implement features and generalize them to fit both the customer that requested them and other current and future customers. I also interacted with stakeholders, to ensure requirements for transitions to and within the platform went as smoothly as possible. The result was several high value features that were met by high praise from several of Camphouse's customers, and helped in getting more customers in the future. BDD (Behaviour Driven Development) Cucumber/Gherkin Elasticsearch Event Sourcing Functional Programming JavaScript Mocha/Chai MongoDB NodeJS React RollupJS Test Driven Development TypeScript SaaS Functional Programming
Dec. 2024 Aug. 2022	Software Consultant, TRETTON37, Lund tretton37 was a software consultancy company where I worked as a software engineer with the main focus on backend development. At tretton37 I partook in the knowledge sharing culture , regularly attending and contributing in events, holding presentations mostly about what I find interesting at my assignment and in my free time. Business Relations Public Speaking Knowledge Sharing Consultant Mindset
Aug. 2021 June 2021	Software Developer / Summer Intern, AXIS COMMUNICATIONS AB, Lund During the internship I got experience with developing a large product using modern engineering practices such as code reviews, CI/CD, and Agile practices. Gaining experience and respect for modern practices. › Learned how to apply my knowledge to a new code base in a unfamiliar language. › Developed a tool to improve the localization process for better accessibility to the customer. › Learned Agile practices and the value it contributes to the process. C# WPF GitHub Actions Agile
Oct. 2019 April 2019	Student Consultant / Developer, CLOUDIST (FORMERLY FORTLAX), Malmö I worked as a student consultant at Cloudist mainly doing work as an API developer using NodeJS. Occasionally doing frontend work as well. › Got some experience working in real life environment. › Learning new technologies quickly. › Making decisions that make an impact. JavaScript PHP NodeJS
Jan. 2019 Nov. 2018	Teachers Assistant Programming Basic Course, JAVA, Lunds tekniska högskola During my studies I worked as a teachers assistant in the basic programming course at LTH. › Practice my educational skills › Hone my communication skills › Rehearse the basics › Get new perspectives on old problems Java Eclipse

AWARDS

PINMeTo - PRODUCT PERSON OF THE YEAR

2025

Honored for rapid integration and leadership within the PinMeTo product organization.

"High output with technical excellence - In addition to being a core contributor to important initiatives such as Locations API v4 and Places, you always go above and beyond to share your expertise and offer support with your deep commitment to quality and technical excellence."

BARCABI.NET

2023

barcabi.net github.com/taffr/barcabinet

Simple website for finding cocktails, given a list of ingredients that might be in your cabinet at home. Built using React, NestJS as I practiced learning Cloud Run and NestJS for my upcoming assignment at IKEA

INTEGRATION AND EVALUATION OF WEBRTC IN AN EXISTING .NET ENVIRONMENT (M.SC. THESIS)

2021-2022

[Paper](#)

My masters thesis performed at LTH and Axis Communications where I integrated and evaluated WebRTC as streaming alternative in the specific .NET environment used in video management systems developed by Axis. Here I learned the full WebRTC stack from scratch, as well as how to adapt to the constraints and requirements which were present and still come up with a viable solution. Evaluating and optimizing the implementation by using QoE metrics and profiling tools along the way.

A SPECIALIZED B-TREE DATA STRUCTURE FOR DATALOG EVALUATION IN JAVA

2020-2021

[Paper](#) [Source Code](#)

Java implementation of the Specialized B-Tree by the Soufflé team. For use in Datalog engines powered by Java. Specialized hint and synchronization for semi-naïve evaluation. Evaluated and compared to other datastructures in the Java runtime library on performance metrics such as memory usage and execution speed.
